PROTECT YOUR INVESTMENT

THE IMPORTANCE OF A FEYNLAB® CERAMIC PROTECTION CHEMICAL RESISTANT – FEYNLAB® Ceramic Coatings give your vehicle's surface chemical protection from foreign elements and environmental contaminants such as bird droppings, acid rain, insect stains, brake dust, road grime, tar, and many other everyday pollutants.

- **WATER REPELLENT** – Feynlab Ceramic Coatings create an ultra hydrophobic, slick, and smooth finish. This hydrophobic layer keeps your vehicle looking cleaner longer and makes washing and drying an absolute breeze.
- **DURABLE SUNSCREEN** – FEYNLAB® Ceramic Coatings act as your vehicle's sunscreen, dispersing over 99% of UVA & UVB rays, offering a broad spectrum of UV protection, and effectively stopping oxidation and paint fading before it starts.
- **LONG-LASTING DURABILITY** – The high ratio of silicon nitride (SiN) and silicon carbide (SiC) present in Feynlab's formulation adds incredible strength and durability to your vehicle's protection, meaning you won't need toppers, waxes, or sealants for years to come.
- **SLICK & GLOSSY** – No other product on the market offers the same level of gloss & shine as Feynlab Ceramic Coatings. The best part is this gloss lasts for years and makes your car look freshly waxed after a simple wash.
- **EASY MAINTENANCE** – The ceramic topcoat prevents staining and environmental contaminants from attaching to your vehicle, making clean-up and maintenance as easy as a simple wash or rinse off.

FILLS PORES FOR SURFACE PREP.

Utilizing our proprietary nano technology, Feynlab Ceramic Coatings not only create a new layer on top of the existing factory clear coat, but also penetrate and fill the micro-pores of the factory clear coat, fortifying the existing clear coat and preventing premature clear coat damage and failure.
